

Classic Series, Wall-Mounted Computer Workstation with Monitor Tilt/Arm - Right/Left Swivel

Closed

Open

The Classic Series CXT-28-SVL models are designed to increase caregiver flexibility and the overall patient experience. An innovative swivel feature allows caregivers to use the workstations right from the patient's bedside, optimizing one-on-one interactions and patient satisfaction. When the unit is no longer in use, it folds back into a tidy, compact unit to create a clean and open room flow.

Standard Features

Swivel Design

Depending on the needs of each facility, this innovative swivel design can be ordered to swivel off of the wall 90 degrees. This feature gives the user optimal flexibility for engaging with the patient.

Two Compartment Curved Door Design

The attractive and traditional two compartment curved door design aids in deflecting collision to the unit, minimizing damage and possible injury.

Sleek & Secure

The upper lockable compartment stores and protects the CPU, cables and power

supply securely. This helps protect against equipment damage and provides caregivers with an unobstructed workspace.

Unit Ventilation

Enhanced ventilation provides continuous airflow to protect equipment in the CPU compartment from overheating.

Recessed Storage

Recessed storage in the main cabinet area allows for additional storage of accessories like scanners and small label printers.

Unique Keyboard & Mouse Storage

Proximity's cabinets feature unique keyboard and mouse storage that allows the accessories to dock automatically when the workstation is closed by the user.

Built to Last

The Classic Series Wall-Mounted Computer Workstations feature work surfaces designed to hold up to 400 lbs. of weight, so even when the workload gets heavy, the workstation remains unscathed.

CXT 28-SVL-T

CXT-28-SVL-T

Like the CXT-28-SVL-A, this Classic Series, Wall-Mounted Computer Workstation features a swivel design that allows the work surface and monitor to swivel off the wall 90 degrees. This innovative design makes this unit ideal for the high-traffic, multi-purpose areas in your facility.

Monitor Tilt Bracket

The monitor tilt bracket offers 25° of pan and 13° tilt adjustability allowing the user to position the monitor for best viewing comfort.

CXT-28-SVL-A

Do more with your workstation with the compact CXT-28-SVL-A unit. This wall-mounted workstation allows users to care for patients right at their bedsides with an integrated swivel design and flexible articulating monitor arm.

Articulating Monitor Arm

The articulating monitor arm supports up to 50 lbs, and allows the user to pull the monitor up to 11" from the back of the cabinet, offering a 10° tilt to minimize glare. With this feature, users can view the patient and the information on the screen simultaneously using the monitor arm's 180° rotation.

CXT 28-SVL-A

CXT-28-SLIM-SVL

When space is an issue, the last thing you need is a computer workstation taking up a large part of the room. That's why the Classic Series, SLIM models are designed with space in mind. Only 5" (10 cm) deep when closed, these workstations are ideal for space constrained and high-traffic areas in mind, so you caregivers have no limitations when caring for their patients.

Left/ Right Swivel Design

This SLIM unit has an integrated swivel design that aids front-line staff in their daily tasks. Depending on the needs of each facility, this sleek and elegant workstation allows users to have increased flexibility when engaging with the patient.
